

From spreadsheets to a **live investor portal** — in a day.

Every stage of the fund, on one platform

From standing the fund up to winding it down, and then again.

Fund setup

- Fund profile, unit classes, fees and hurdle
 - Your team, with access granted page by page
 - Your statement built from the Word file you already send

Capital raising and onboarding

- Guided KYC built for India, step by step
 - Agreements e-signed in sequence, or offline
 - Every investor on one register, ringfenced to your fund

Final close and investor reporting

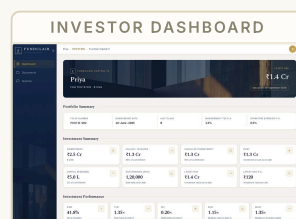

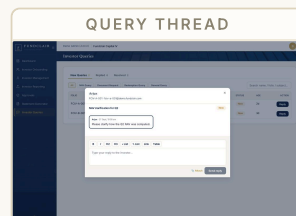

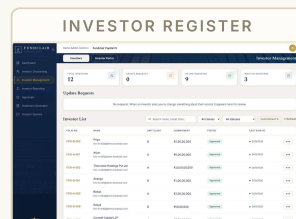

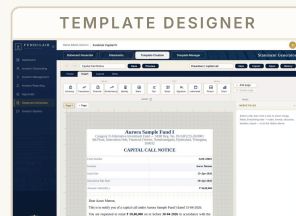

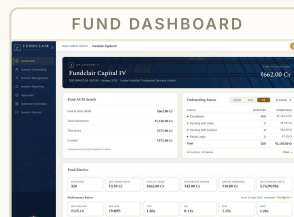

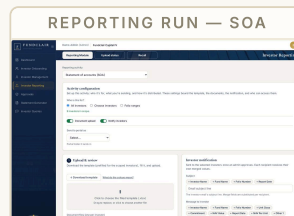

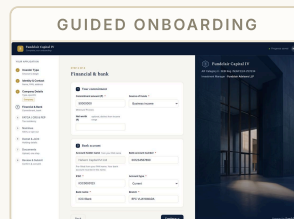

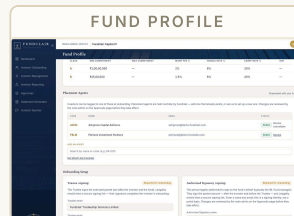

- Calls, drawdowns and allotments as governed runs
 - Your statement across the whole book in one pass
 - Nothing reaches an investor on one pair of hands

Repayments and wind-up

- Distributions and redemptions, the same governed way
 - Every notice and statement stays filed under the folio
 - Questions answered on a thread that leaves a record

The next fund

- One sign-in across every fund you run
 - Your statement template copies across to it
 - An investor who backs you twice sees both

GOVERNED AT EVERY STAGE

Two people on anything consequential, an audit trail that writes itself as your team works, access scoped to each team, and data isolated per fund and held in India.

800 investors in one fund · 4,000+ reportings in an hour · zero errors, measured on our own run

Maker-checker + audit trail · Data hosted in India (Mumbai) · Per-fund isolated storage · Team access, page by page · **DPDP-aligned**
